ADMINISTRATIVE BULLETIN INDEX

The Executive Office for Administration and Finance publishes a series of Administrative Bulletins each year which regulate agencies and departments within the Commonwealth. These bulletins cover a variety of subjects, including personnel policies, state contracts and administrative budgets.

The State Library has prepared this index as a subject listing of Bulletins from 1960 to the present. Please note that two bulletins from 1951 are on microfilm. All others are available in paper copy form in the State Library.

Each entry gives a broad subject heading for the bulletin followed by some specific aspects of it. Names of government agencies involved in the administration of the regulation are included, as well as pertinent information on forms to be filed. The date of issuance is given as a point of reference.

For government researchers, two important items have been included. The first is the status of the bulletin as it relates to other bulletins in the index. Thus, researchers can easily tell whether the bulletin they are researching has been amended or superseded. A list of the abbreviations used in this status field is also given preceding the index.

The second research tool in the index is the citation to Massachusetts statutory authority. This citation is given only if statutory authority is cited in the text of the bulletin.
